

Clinical Research Registration at Public Registry

Please note that according to ICH GCP requirement:

“every research study involving human subjects must be registered in a publicly accessible database before recruitment of the first subject”

Therefore, for all sponsored and investigator initiated studies, please ensure the studies have been registered at a public registry before any enrolment.

Studies can be registered at any of the below registries:

1. [Clinicaltrials.gov](https://clinicaltrials.gov)

You can register the study by yourself at [here](#)

2. [WHO international clinical trials registry platform \(WHO ICTRP\)](https://www.who.int/clinical-trials-registry-platform)

You can register your study through CUHK “centre for clinical research and biostatistics” at [here](#)

Please feel free to contact CRMO at 3505 4276 for any query.
